Magnification Level Test For Computer Glasses

To determine what magnification level you need for your computer glasses just print this page, hold the paper about 18 inches away from you, and read each line of text. The largest line of text that you have difficulty reading corresponds with the magnification level that you need.

**Level-1
Magnification**

If this line of text is blurry you need Level-1 magnification.

**Level-2
Magnification**

If this line of text is blurry you need Level-2 magnification.

**Level-3
Magnification**

If this line of text is blurry you need Level-3 magnification.
